## 5.2.2 Average percentage of outgoing students progressing to higher education during the last five years

Year	2016-17	2017-18	2018-19	2019-20	2020-21
Number of outgoing student progression to higher education during the last five years	8	33	42	36	33
Total Number of Final Year Students	150	56	134	159	219

The following Formula is used for the calculation of percentage per year values as per the NAAC Manual :

$$\text{Percentage per year} = \frac{\text{Number of Outgoing students progressing to higher education}}{\text{Total number of final year students}} \times 100$$

With the help of the above formula, the Percentage per year values are obtained as follows:

Year	2016-17	2017-18	2018-19	2019-20	2020-21
Percentage Per Year	5.33	58.93	31.34	22.64	15.07

Further, with the help of the percentage per year values, average percentage is calculated as follows:

$$\begin{aligned} \text{Average Percentage} &= \frac{\text{Percentage per year}}{5} \\ &= \frac{\sum 5.33+58.93+31.34+22.64+15.07}{5} \\ &= 26.66 \end{aligned}$$

Thus, Average percentage of outgoing students progressing to higher education during the last five years is 26.66.
