7.1.4 Water conservation facilities available in the Institution

There are no separate water conservation facilities in the college like Rain water harvesting, Borewell /Open well, recharge tanks and bunds and Waste water recycling. But the college administration makes sufficient efforts to reduce the wastage of water. The college administration makes sure that the surrounding places of water sources (borwells) are kept clean and hygienic. The teachers also educate the students about sensible and minimal use of water in the campus and in their day to day life.
